Speaker Profile: Dr Jeremy Silver - CEO, Digital Catapult

'The Industrial Internet – a new frontier for startups'

Jeremy Silver is CEO of the Digital Catapult. He is an author and entrepreneur specialising in digital media, big data, music and the creative industries. He is a non-executive director of a number of early stage companies in music and media. He is a member of the UK Creative Industries Council and was Executive Chairman of Semetric Ltd (acquired by Apple), CEO of Sibelius Software (acquired by Avid) and Worldwide Vice-President of New Media for EMI Group in Los Angeles. He was an advisor to the founders of Shazam. He co-founded Uplister in San Francisco, which was the world's first playlist-sharing music service. He is author of the acclaimed book Digital Medieval: the first twenty years of music on the web – and the next twenty. His discussion paper Blockchain or Chaingang was published by CREATe at the University of Glasgow, where he is an Industry Fellow.

CWIC 2018 - 'Thinking Beyond The Hype'

4th July 2018

This conference will challenge, inform & inspire delegates to think beyond the hype, focusing on seven technology areas.

We live in a world in which proponents of new technologies claim that they have the potential to dramatically change our lives, and the technologies seem to emerge on an almost weekly basis.

CW members and the wider community work intensively on the development of new technologies as well as their deployment into new application areas.

CWIC 2018 will focus on technologies which have received significant attention over the past year which are critical for the ongoing digital transformation of society. The technologies that this year's CWIC will be focusing on are:

- Artificial Intelligence
- Satellites
- Blockchain
- Health
- Industrial IoT and the Connected Enterprise
- 5G and Network Innovation
- Mixed Reality

We are welcoming introductions to speakers who can talk confidently on the subject area. We are looking for alternative opinions, as well as industry applications of technology. If you think that this could be you, or someone you know, nominate a speaker on our website.

Are you maximising your CW Founder Membership Benefits?

Attend our events for free to share knowledge, raise brand awareness and make valuable connections. Check our CW website for these upcoming events.

17 April   **Artificial Intelligence SIG Event**

Girton College

Girton College is one of the 31 constituent colleges of the University of Cambridge. The college was established in 1869 as a college for women. Girton was granted full college status by the university in 1948, marking the official admittance of women to the university.

Situated approx 3 miles out of the centre, to the north of Cambridge it is situated on the outskirts of the village of Girton and comprises 33 acres of land. The buildings are typical Victorian red brick design, most built by the Architect Alfred Waterhouse. The Girton campus is also home to a rare breed of black squirrels.

#CWFoundersDinner

New Founder Members joining us tonight

Amazing Prospects - *Mark Ashton*

Technology search and selection recruitment agency for Cambridge, helping Tech companies grow and generate more income.

Appleyard Lees - *Dick Waddington*

If you are in the business of innovation, then patents are a vital business tool. Our technical specialists will quickly understand your invention in the context of your business and advise you on the best strategy to suit your needs.

Beyond Media - *Kent Height*

Beyond Media is a full service marketing agency working with B2B, SaaS and technology businesses. They provide highly targeted, effective campaigns that reduce the cost of client acquisition and increase ROI.

Codeplay Software - *Charles Macfarlane*

Codeplay Software's solutions connect AI to Silicon allowing developers of machine learning and vision processing applications to focus on innovation, accelerated solutions and faster time-to-market using open standards-based platforms.

Proof. Work. Health - *Siddhi Trivedi*

PROOF™ secures blockchain enabled medical data through therapy related conversational engagement layers, mHealth IOT devices and medical pharma thumbprints, improving communications between patients, caregivers and health practitioners thereby improving medical adherence rates.

Prowler.io - *Vishal Chatrath*

PROWLER.io develops an AI platform for dynamic decision-making in complex systems. It brings together machine learning, probabilistic modelling, and game theory to harness high-dimensional data in large, complex environments.

RS Components - *Pete Wood*

RS Components has been supporting engineers for 80 years. Known and loved by generations of engineers from around the world, RS Components have been designed into millions of applications

Vector Resourcing - *Emily Coombs*

Vector Resourcing is an established supplier of Technology & Software professionals. Our Cambridgeshire office is one of four regional offices. Knowing the local candidate network is our biggest strength.
