radish, watercress and shaved pecorino
(Veg option)

~

Pecan pear tart, eggnog custard, blueberry puree

(Vegetarian options are by pre-order only)

Prof. Andrew Blake, Artificial Intelligence Consultant, Chairman SAIC

Vision for AI

Andrew Blake is the pioneer in the development of the theory and algorithms that make it possible for computers to behave as seeing machines. He is especially interested in segmentation as optimisation, in visual tracking as probabilistic inference, and in real-time, 3D vision.

He trained in mathematics and electrical engineering in Cambridge UK and at MIT, and studied for a doctorate in Artificial Intelligence at the University of Edinburgh. He was an academic for 18 years, in Edinburgh and Oxford, ultimately as Professor of Information Engineering at Oxford University. He joined Microsoft in 1999 to found the Computer Vision group in Cambridge, before becoming Director of Microsoft's Cambridge Laboratory in 2010 and a Microsoft Distinguished Scientist. He was Director at The Alan Turing Institute 2015-8. He has been Honorary Professor of Machine Intelligence at the University of Cambridge since 2007 and is a Fellow of Clare Hall. He has been a Fellow of the Royal Academy of Engineering since 1998 and Fellow of the Royal Society since 2005.

Currently as a consultant in Artificial Intelligence, he is the Chairman of Samsung's AI Research Centre, SAIC in Cambridge, Consultant and Scientific Advisor to FiveAI and advisor to Siemens.

Profile of Sponsor

call hr are a provider of a full hr consultancy and outsourcing service that spans the complete employee lifecycle.

Our HR services include candidate attraction and assessment centres, selection, onboarding, development, engagement, separation and outplacement. We also take on all the administrative requirements for employing staff. Our service is tailored to your business as every business has it's own way of operating - we create a HR service that reflects your business.

Our talent sourcing solution can support you with candidate attraction, head hunting and psychometric profiling to ensure you find a perfect match. Our expertise lies at senior and board level where we take a personal approach and our Talent Directors take time to understand your company, the challenges and complexities you face, your culture and the requirements of the role.

User Experience SIG
- 24 Jan** **Assembling the A-Team - The Bradfield Centre**
Business SIG
- 25 Jan** **Marks & Clerk Clinic - The Bradfield Centre**
CW Clinics
- 30 Jan** **Mobility-as-a-service: What are the opportunities and challenges? - CMS, London**
Legal SIG

February 2019

- 01 Feb** **The Cambridge Start-up Billion Pound Scale-up - The Bradfield Centre**
- 07 Feb** **"Just who do you think you are" Identity, anonymity and online behaviour**
Engineering Trust Programme
- 20 Feb** **Tablecrowd: February Dinner - D'Arry's Liquor Loft & Resturant, Cambridge**

CWIC 2019

On the 26th June 2019 CWIC will return to the popular Wellcome Genome Campus Conference Centre. The conference will focus on vertical industries and how a variety of industries perceive technology and its impact on their business models.

For sponsoring/speaking/attending enquiries, please contact our Head of Events, Rachel Kerr at: rachel.kerr@cambridgewireless.co.uk

Gonville & Caius

In 1348, Edmund Gonville, rector of Terrington in Norfolk founded Gonville Hall on the site of what is now Corpus Christi College. Following the death of Gonville in 1351, William Bateman, the Bishop of Norfolk, took over the supervision of the building work and moved the college to it's present site in 1353.

Nearly 200 years later in 1529, John Caius entered Gonville Hall to study humanities, later studying medicine at the University of Padua. Upon his return in 1557, he set about restoring Gonville Hall after hearing that the college had fallen into disrepair. He obtained a charter from Queen Mary and renamed it 'Gonville and Caius'.

The College is also renowned for the 3 original gates built by Caius: The Gate of Humility; the Gate of Virtue and the Gate of Honour.

New Founder Members joining us tonight

Anglia Ruskin University - Sarah Bell

Anglia Ruskin University is an innovative global university with students from 185 countries studying with us. Once again, we've been named as one of the top 350 institutions in the world in The Times Higher Education's World University Rankings 2018.

Granta Innovation - Antony Rix

Granta Innovation works to revolutionise cancer diagnosis using machine learning and MRI, building on founders' experience in AI, software and medical practice. Currently seeking investors to develop this exciting technology.

Green Custard - Jonathan Custance

Green Custard is an intelligent team of custom software experts. They work with startups through to global enterprises, delivering across multiple technology areas in an agile, supportive, and honest manner.

Kyneism - Neil Spence-Jones

We are a technology development company solving hard problems on tight deadlines. We help you articulate what you really need, providing an accurate technology solution roadmap and delivering it to timescale and budget.

Orbital Media - Peter Brady

Orbital Media is one of the UK's most innovative digital agencies, managing brand presence for global corporations. It's also a tech company, with a portfolio of groundbreaking innovations in VR, AR, AI and gamification.

Sitracker - David George

Sitracker is a complete software platform for managing high-volume distributed capital projects and assets, allowing organisations to effectively manage an increasing volume, velocity, and variety of activities (e.g. 5G deployments)

UN Environment World Conservation Monitoring Centre - Steve Fletcher

UNEP-WCMC confronts the challenges faced by our world's biodiversity. In partnership with UN Environment, we connect science, policy and society to creative positive and sustainable impact for people and nature.

University of East London, Knowledge Dock - David Jai-Persad

UEL has expertise in data science, cyber security, GIS, AI, machine learning, sustainability and Community Health. We want to apply our knowledge to develop solutions to real-world challenges.

Yellow Submarine - Justin Staines

Start up software company using Deep NN AI to give the ability to "learn" and "predict" from data, creating a ML Platform RESTful API for Wireless, Credit and E-Commerce.
