

**CW Founders' Dinner**  
**Chaired by Raj Gawera, Chairman of CW**  
**Emmanuel College, Cambridge**  
**12 September 2019**

**Agenda**

- 17:30** Drinks Reception and Business Networking sponsored by **PwC UK**
- 19:00** Welcome from Chairman of CW, Raj Gawera
- 19:20** Dinner served
- 21:00** Speech by **Corli Pretorius, Deputy Director of UN Environment World Conservation Monitoring Centre** followed by Q&A
- 21:30** Networking until 22:00

**Menu**

Tunworth Cheese, Caramelized Onion and Mushroom Cocotte,  
Semi Dried Tomato Relish (Veg)

~

Pan Roasted Duck Breast, Leg, Chicken and Pistachio Press,  
Cherry Dressing, Fondant Potato

or

Beetroot and Soy Tatin, Feta Cheese, Mint and Pumpkin Seeds (Veg)

~

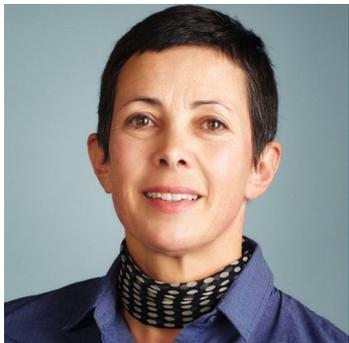

Apple and blackberry A mascarpone mousse, apple compote,  
blackberry sorbet

~

Coffee and mints

**(Vegetarian options are by pre-order only)**

## Corli Pretorius, Deputy Director, UNEP-WCMC

### **'Can the tech sector provide profitable solutions to the challenges of people and nature?'**

Corli Pretorius is the Deputy Director of the UN Environment World Conservation Monitoring Centre (UNEP-WCMC), based in Cambridge, UK.

She brings almost 20 years of experience in global public policy on environment and development, including the last ten years with the UN Environment Programme.

Enabling governments and business to better integrate biodiversity and ecosystem knowledge in decision-making is a key component of her work. Earlier, she worked for IUCN in Gland, Switzerland and started her international career with the Secretariat of the World Commission on Dams, based in Cape Town, South Africa.

She has degrees in planning, agricultural development and agricultural economics.

## New CW members

### **Archipel & Co - Justin DeKoszmovsky**

Archipel&Co partners with clients to accelerate the transition to an inclusive economy. We deliver operational and commercial results by building market insights, designing inclusive approaches and testing innovations in emerging, informal and precarious markets. We are a combination of thinker, doer and change-agent.

### **Cambriornix - Paul Bailey**

Cambriornix are specialists in the design and manufacture of USB hubs for the professional marketplace, creating innovative solutions for high-speed data transfer and mobile device charging.

### **CorrosionRADAR Ltd - Chiraz Emaeur**

CorrosionRADAR is pioneering cutting edge sensor technology, IoT and predictive analytics to deliver the smartest solutions that solve the world's most challenging corrosion problems.

### **Crayfish.io - Ting Zhang**

Crayfish.io is a leading service provider for better engagement with China, powered by technology. Crayfish.io provides the expertise to assist you through all your multi-lingual business needs, the connection to facilitate cross-border collaborations, and the capital to bring your business to China.

## New CW members

### **Government of British Columbia - Rhoda Campbell**

Government of British Columbia (Canada), with its resource rich and rugged terrain has always been at the forefront of wireless innovation. The European office fosters trade, investment and innovation partnerships across Europe.

### **HearAngel - Stephen Wheatley**

Headphone use can permanently damage your hearing. We have developed firmware an app that helps you protect yourself and handset and wireless headphone manufacturers to meet the new safety standards.

### **Marketplace AMP Ltd - Matthew Anderson**

An experienced international team of e-commerce technical, retail and marketing specialists, working with global clients to set up, optimise and advertise on online marketplaces, supported by Alexa Skills and AI Heatmap Technology.

### **Myriofoam Ltd - Peter Hill**

Myriofoam is developing high capillarity micron-scale metal foams for electronics heat transfer, energy storage and lightweight structures.

### **RPD International - Eduardo Ristow**

RPD provides end-to-end product development and manufacturing services bringing innovation to market. From consumer goods to medical devices, we support engineering, certification, and supply chain giving clients speed to launch.

### **University of Hertfordshire - Vito Veneziano**

The University of Hertfordshire is a student-friendly, research active and business-facing academic institution. Computer Science at UH (1200+ students, 100+ staff) specialises in AI, robotics and cyber-security.

### **VMHosts Ltd - James Harvey**

VMhosts is a technology-focused company delivering high performing solutions. We believe in continuous development; hence our investment in new technologies enable our customers to cope with ever-changing business needs.

### **Zizo Software - Matthew Napleton**

Zizo use a combination of our unique, patented technology alongside years of expertise to enable companies of all sizes to understand their data and deliver business value from it.

## Emmanuel College

Founded in 1584 by Sir Walter Mildmay, Chancellor of the Exchequer under Elizabeth I, Emmanuel has a rich history of high achievement. With three Nobel peace prize winners, a decipherer of Egyptian hieroglyphs and John Harvard, whose bequest helped to secure the future of the University that now bears his name; explore the past that has created our future.

## Upcoming CW events

### September 2019

- 17 Sep** **The present, the future & the challenges of AR/VR - London**  
Future Devices & Technologies SIG
- 24 Sep** **CW Unplugged: Tech for Water - Cambridge**  
CW Unplugged: Tech for the Environment
- 26 Sep** **CW TEC 2019: 5G, Satellites & Magic MIMO - Cambridge**  
CW TEC
- 30 Sep** **An Advanced Introduction to 5G Technology - London**  
CW Tech Training led by Zahid Ghadialy

### October 2019

- 01 Oct** **Analog Devices LTSpice® Seminar - Cambridge**  
Collaboration Workshop
- 08 Oct** **Shaping a scaleup Business for the 21st Century Workforce - Cambridge**  
Business SIG
- 15 Oct** **Start up and scale up faster using your IP - Cambridge**  
Joint Small Cells & Radio Technologies SIG
- 21 Oct** **Technology enablers for 5G spectrum sharing - London**  
Radio Technologies & Small Cells SIG

## CWTEC: 5G, Satellites & Magic MIMO

This year's CW TEC on the 26 September at the Computer Laboratory, University of Cambridge will focus on 5G, Satellites & Magic MIMO.

CW TEC 2019 is a day designed specifically for engineers. With 5G moving from theory into practice, this one day event will explore in intimate detail the new technologies that are transforming the mobile network.

At CW TEC 2019, we will focus on new 5G technologies that are changing the industry today, the consequences of which will reverberate long into the future. With a particular focus on the engineering challenges of 5G access networks and last mile connectivity – including delivering on latency targets, or providing coverage to rural areas - the agenda will give delegates access to the opinions and experience of prominent subject matter experts from across the telecommunications industry.
