**Profile of CW**

CW is the leading international community for companies involved in the research, development and application of wireless and mobile, internet, semiconductor and software technologies.

With over 400 members from major network operators and device manufacturers to innovative start-ups and universities, CW stimulates debate and collaboration, harnesses and shares knowledge, and helps to build connections between academia and industry. CW's 19 Special Interest Groups (SIGs) provide its members with a dynamic forum where they can network with their peers, track the latest technology trends and business developments and position their organisations in key market sectors. CW also organises major conferences and start-up competitions along with other high-quality industry networking events and dinners.

With headquarters at the heart of Cambridge, UK, CW partners with other international industry clusters and organisations to extend its reach and remain at the forefront of global developments and business opportunities. **About the venue**

The Information Age gallery celebrates more than 200 years of innovation in information and communication technologies.

Re-live remarkable moments in history, told through the eyes of those who invented, operated or were affected by the new wave of technology, from the first BBC radio broadcast in 1922 to the dawn of digital TV.

Discover how wireless technology saved many lives on the Titanic and spread news of the disaster to the world within hours. You can also hear the personal stories of the operators who worked on the Enfield Telephone Exchange, the last manual exchange.
